

**CHARNWOOD BOROUGH COUNCIL**

**POLLUTION PREVENTION AND CONTROL ACT 1999**

**ENVIRONMENTAL PERMITTING (ENGLAND AND WALES)  
REGULATIONS 2016**

**PERMIT REF. NO. 156**

Charnwood Borough Council hereby permits, under regulation 13 of the of the Environmental Permitting (England and Wales) Regulations 2016

**CR CIVIL ENGINEERING LTD ('the operator')**

Registered office:

**QUORN HOUSE, CHARNWOOD BUSINESS PARK,  
NORTH ROAD, LOUGHBOROUGH, LEICESTERSHIRE LE11 1LE**

Registration Number: **3950591**

To operate crushing and screening plant at:

**THE OLD COLLIERY SITE, ASHER LANE, RIPLEY, DERBYSHIRE  
DE5 3RE**

subject to the conditions outlined in this document.

The conditions contained herein shall apply from the date of the Permit unless otherwise stated.

Name	Date
Beverley Green	13 September 2022

Authorised on behalf of Charnwood Borough Council

Issued by:

Regulatory Services, Environmental Protection Southfields, Southfields Road,  
Loughborough, Leicestershire LE11 2TX

## Introductory note

### This introductory note does not form a part of the permit

The following Permit is issued under Regulation 13 of the Environmental Permitting (England and Wales) Regulations 2016 (SI 2016/1154), as amended, (“the EP Regulations”) to operate an installation carrying out one or more of the activities listed in Part 2 of Schedule 1 of the EP Regulations, to the extent authorised by the Permit:

Section 3.5, Part B

"Any activity of crushing, grinding and other size reduction of bricks, tiles or concrete by machinery designed for that purpose"

### Status Log

Detail	Date	Comment
Duly made application	28 July 2022	Notification sent
Permit Determined	13 September 2022	

### Origins of the conditions contained in the permit

The Secretary of State has issued various guidance notes to local authorities to assist with determining those conditions which represent ‘best available technique’ in the different circumstances which apply to each installation. The conditions within this permit have been derived from the following guidance note;

PG 3/16 (12) Statutory Guidance for Mobile Crushing & Screening.

### Activity Description

The crushing, grinding and other size reduction, conveying and loading of material using the plant listed in Appendix 1/156. The plant can undertake the crushing and screening of brick, tile and concrete waste.

### Principle Emissions

The principle emissions that warrant control are those consisting of particulate matter.

The following parts of the process may give rise to particulate matter in the form of dust:

- Crushing and grinding
- Loading and unloading
- On-site transfer of dusty materials.
- Stockpiles
- Roadways, including haulage roads.

**End of Introductory Note.**

## **Permit Conditions**

1. The above named company is permitted to operate crushing and screening plant listed in Appendix 1/156, for the waste types listed in Table 1 below, subject to compliance with the following permit conditions:

Table 1- relevant waste types

<b>Codes</b>	<b>Waste types</b>
170101	Concrete
170102	Bricks
170103	Tiles and ceramics
170107	Mixtures of concrete, bricks, tiles and ceramics (other than those mentioned in 170106)

2. The total quantity of such waste stored on site at any time shall not exceed 2000 tonnes.
3. All wastes that are accepted onsite shall be accompanied with the appropriate waste duty of care paperwork.

## **Notifications**

4. The operator shall submit to Charnwood Borough Council any changes to the permitted plant listed in Appendix 1/156. The plant new to the list shall not be used until Charnwood Borough Council has approved the alteration to the list of permitted plant.

## **Emissions and monitoring**

5. No visible dust or particulate matter shall be emitted beyond the site boundary from the operation of the crushing or screening plant.
6. The emission requirements, monitoring location, methods and frequency of monitoring set out in Table 2 shall be complied with.

**Table 2 – Emission limits, monitoring and related provisions**

<b>Substance</b>	<b>Source</b>	<b>Emission Limit/provisions</b>	<b>Type of monitoring</b>	<b>Monitoring frequency</b>	<b>Monitoring Location</b>
Particulate matter	Whole process	Avoidance of visible emissions crossing the site boundary	Recorded operator observations	On start up and on at least two more occasions each day.	At monitoring point shown in Appendix 2/156
smoke	Engines	No visible smoke during normal operation	Recorded operator observations	On start up and on at least two more occasions each day.	At monitoring point shown in Appendix 2/156

**Emissions of substances not controlled by emission limits**

7. The operator shall:
  - (a) if notified by the Regulator that the activities are giving rise to pollution, submit to the Regulator for approval within the period specified, a dust emission management plan which identifies and minimises the risks of pollution from emissions of substances not controlled by emission limits;
  - (b) implement the approved dust emission management plan, from the date of approval, unless otherwise agreed in writing by the Regulator.
8. All plant and equipment capable of causing, or preventing emissions shall be maintained in accordance with the manufacturer's instructions. Records shall be kept of such maintenance.

**Aggregates delivery and storage**

9. Stockpiles of dusty materials (including dusty wastes) and products shall be subject to suppression and management techniques to minimise dust emissions.
10. Where water bowsers/sprays are used as dust suppression of stockpiles the stockpile height shall not exceed range of the water suppression.

**Crushers and screening units**

11. The crusher shall be fitted with a water suppression system over the crusher feed and conveyor discharge.
12. Where the use of water as a method of dust suppression is necessary in order to meet the emission limits, it shall be used. In such circumstances, if water of the required pressure is not available for use on the suppression system, then the process shall not operate.
13. Deposits of dust on external parts of the plant shall be cleaned off at the end of each working day in order to minimise the potential for wind entrainment.
14. Processed materials likely to generate dust shall be conditioned with water prior to internal transfer.

**Belt Conveying**

15. Where dusty materials, including wastes, are conveyed there shall be adequate protection from wind whipping.

**Loading, unloading and transport**

16. No potentially dusty materials (including wastes) or finished products shall arrive on or leave the site other than by covered trucks.

**Roadways and transportation**

17. All areas where there is regular movement of vehicles shall have a consolidated surface capable of being cleaned and these surfaces shall be kept clean and in good repair.
18. Vehicles shall not tack material from the site onto the highway.

**Records and training**

19. Written or computer records of all tests and monitoring shall be kept by the operator for at least 36 months. They and a copy of all manufacturers' instructions for the crusher shall be made available for examination by an authorised officer of the local authority. Records shall be kept of operator inspections, including those for visible emissions.
20. Staff at all levels shall receive the necessary training and instruction to enable them to comply with the conditions of this permit. Records shall be kept of relevant training undertaken.

**Best available techniques**

21. The best available techniques shall be used to prevent or, where that is not practicable, reduce emissions from the crushing and screening plant in relation to any aspect of the operation of the plant which is not regulated by any other condition of this permit.
22. If the operator proposes to make a change in the operation of the plant, he must, at least 14 days before making the change, notify Charnwood Borough Council in writing. The notification must contain a description of the proposed change in operation. It is not necessary to make such a notification if an application to vary this permit has been made and the application contains a description of the proposed change. In this condition 'change of operation' means a change in the nature or functioning, or an extension of the plant, which may have consequences for the environment

**Directly Associated Waste Activity**

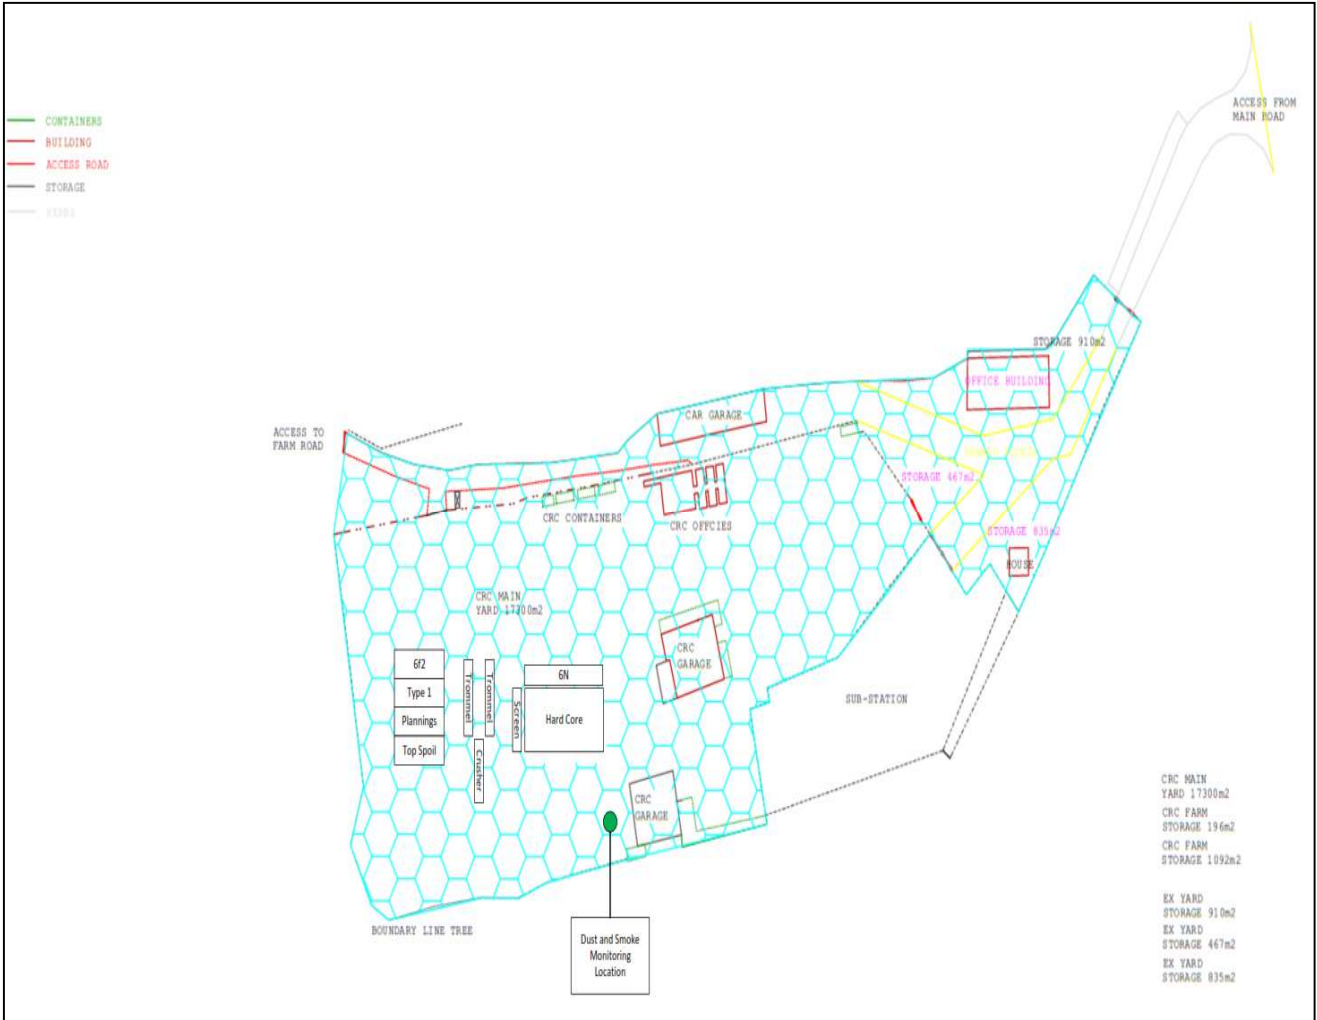

23. All liquids, whose emission to water or land could cause pollution, shall be provided with secondary containment, unless the operator has used other appropriate measures to prevent, or where that is not practicable, to minimise leakage and spillage from the primary container.
24. Emissions from the waste operations shall be free from noise and vibration at levels likely to cause pollution outside the site, as perceived by an authorised officer of the local authority, unless the operator has used appropriate measures, to prevent or where that is not practicable, to minimise, the noise and vibration.

**End of Conditions**

## Appendix 1/156- Permitted Plant

<b>Plant Serial Number</b>	<b>Details</b>
RM 90GO!-01.009	RUBBLE MASTER RM90
	WATER BOWSER
12786	McCLOSKEY 412R TROMMEL
540	DOPPLESTADT SM518 TROMMEL
7204771	BRISTAR POWER SCREEN

## Explanatory Notes

**These notes do not comprise part of the permit but contain guidance relevant to it.**

### Inspections

Regular inspections will be made by officers of Charnwood Borough Council (without prior notice), in order to check and ensure full compliance with this permit.

### BAT ( Best Available Techniques)

The Permit includes conditions that have to be complied with. It should be noted that aspects of the operation of the installation which are not regulated by conditions of the Permit are subject to the implied condition that the Operator shall use the best available techniques for preventing or, where that is not practicable, reducing emissions from the installation. Techniques include both the technology used and the way in which the installation is designed, built, maintained, operated and decommissioned.

### Change in Operation of the Installation

If you, the operator proposes to make a change in operation of the installation you must at least 14 days before making the change, notify Charnwood Borough Council in writing. The notification must contain a description of the proposed change in operation. It is not necessary to make such a notification if an application to vary this permit has been made and the application contains a description of the proposed change. A 'change in operation' means a change in the nature or functioning, or an extension, of the installation, which may have consequences for the environment.

### Health and Safety at Work and Other Statutory Requirements

The responsibility you have under legislation for Health, Safety and Welfare in the workplace remains in force. In addition, the Permit does not relieve you of your obligations to obtain planning permission, hazardous substances consent, discharge consent from the Environment Agency, Building Regulations approval, or some Waste Disposal Licences.

### Submission of Information

Note that the Permit requires the submission of certain information to the Local Authority (LA). In addition, the LA has the power to seek further information at any time under the EP Regulations provided that it acts reasonably.

### Public Registers

Considerable information relating to Permits including the Application is available on public registers in accordance with the EP Regulations. Certain information may be withheld from public registers where it is commercially confidential or contrary to national security. The onus is on the Operator to provide a clear justification for each item to be kept from the register. Applications for information to be excluded from the Public Register on grounds of National Security should be made to the Secretary of State.

### Variations to the Permit

This Permit may be varied in the future (by the LA serving a Variation Notice on the Operator). If the Operator itself wants any of the Conditions of the Permit to be changed, it must submit a formal Application. The Status Log within the Introduction will include summary details of this Permit, variations issued up to that point in time and state whether a consolidated version of the Permit has been issued.

### Surrender of the Permit

Where the Operator intends to cease the operation of an installation (in whole or in part) The LA should be informed in writing, such notification must include the information specified in the EP Regulations.

### Transfer of the Permit or part of the Permit

Before the Permit can be wholly or partially transferred to another person, an Application to transfer the Permit has to be made jointly by the existing and proposed holders. A transfer will be allowed unless the LA considers that the proposed holder will not be the person who will have control over the operation of the installation or will not comply with the conditions of the transferred Permit.

### Annual Subsistence Fee

Under the EP Regulations the holder of a permit is required to pay a fee for the subsistence of the permit. This fee is payable annually on 1st April. You are advised that under the provisions of the EP Regulations, if you fail to pay the fee due promptly, Charnwood Borough Council may revoke the permit. You will be contacted separately each year in respect to this payment.

### Talking to us

Please quote the Permit Number if you contact Charnwood Borough Council about this Permit. To contact Charnwood Borough Council please use the telephone number 01509 634636 or any other number notified in writing to the Operator by Charnwood Borough Council for that purpose.

### **Right To Appeal**

Anyone who is aggrieved by the conditions attached to a Permit can appeal to the Secretary of State. Appeals must be sent within 6 months from the date of the permit (normally the date on the bottom of the permit).

Appeals should be addressed as follows:-

The Planning Inspectorate  
Environmental Appeals Administration  
Room 4/19 Eagle Wing  
Temple Quay House  
2 The Square  
Temple Quay  
Bristol BS1 6PN

An appeal will not suspend the effect of the conditions appealed against; the conditions must still be complied with.

There are no forms or charges for appealing. However for an appeal to be valid, appellants are legally required to provide information detailed below:

- i. A statement of the grounds of appeal
- ii. A copy of any relevant permit
- iii. A copy of any relevant correspondence between the appellant and the regulator
- iv. A statement indicating whether the appellant wishes the appeal to be in the form of a hearing or dealt with by way of written representations.

At the same time, the notice of appeal and documents (i) and (iv) must be sent to the Council.

In determining an appeal against one or more conditions, the Regulations allow the Inspector or Secretary of State to affirm or quash conditions or to add new conditions

You will be liable for prosecution if you fail to comply with the conditions of this permit. If found guilty, the maximum penalty for each offence if prosecuted in a magistrates Court is an unlimited fine and/or 12 months imprisonment. In a Crown Court it is an unlimited fine and/or a 5 years imprisonment.

Our enforcement of your permit will be in accordance with the Regulator's Compliance Code.
